Unigy[®] 360

One cloud-based solution for all your
compliant communications needs

Connecting opportunities

Comprehensive, Customizable Communications – Simplified

One service.
One provider.
Period.

IPC® introduces Unigy® 360 – a Software as a Service communications solution for firms of all sizes. Unigy 360 is scalable, delivered on-demand and able to respond to your business needs as they evolve and grow. Unigy 360 delivers the advantages of IPC's industry-leading Unigy® platform for unified communications and applications and the simplicity and scalability of a cloud-based solution. Unigy 360 is the essential communications solution that can provide secure and reliable connections to your counterparties and the IPC financial markets community. User functionality can be tailored to individual user workflow to drive productivity. With a communications-as-a-service solution your firm has it all – quickly, easily and from just a single trusted provider: IPC.

Unigy 360 is the one solution to meet your firm's communication needs today and in the future.

Key Benefits of Unigy 360

Access Anytime, Anywhere

Business communication is no longer just a 9-to-5 occurrence from the company office. With Unigy 360 you have an anytime, anywhere solution for all your communications needs over multiple endpoints. Users have compliant mobile access to all internal and external counterparties wherever and whenever they need to connect.

Secure Communications

Benefit from IPC's own advanced technology and security processes as well as built-in product and application security. Together these layers ensure your vital communications are protected with the latest security solutions – you and your users operate with peace of mind.

- User authentication and counterparty verification help protect valuable information
- Encryption solution for data at rest and data in transit
- The platform security of Unigy 360 stays at its highest levels to make sure your data is confidential

Flexibility to Grow and Change with You

The scalability of Unigy 360 lets you add services and users where and when you need them, with no large up-front investment of resources or costs, all with a rapid time-to-market with no lengthy installation process. Unigy 360 is a customizable, on-demand and cost-effective solution all in one.

Compliant Communications for All Media Types

Unigy 360 delivers an integrated end-to-end compliance solution. It takes the stress out of purchasing and integrating disparate solutions to manage compliance of communications from multiple sources. For all your communications media in the trade lifecycle – voice, IM, mobile, email:

- Comprehensive capture
- Comprehensive archival and data lifecycle
- Policy management
- Analytics – search, replay, analysis
- Access to data via APIs

More options than ever for

Compliant Interactions

Unigy 360 offers you Anytime, Anywhere Access through the Unigy 360 app.

Your teams need mobility, and with the Unigy 360 app they have it, along with the efficiencies and productivity that come with a common workflow across multiple endpoints. Available on desktop, laptop, tablet and iOS or Android, the app provides the security and reliability your organization needs. As part of the Unigy platform, the app benefits from compliance tools that help meet regulatory requirements associated with communications.

Rely on IPC's expertise to help you design your communication solution.

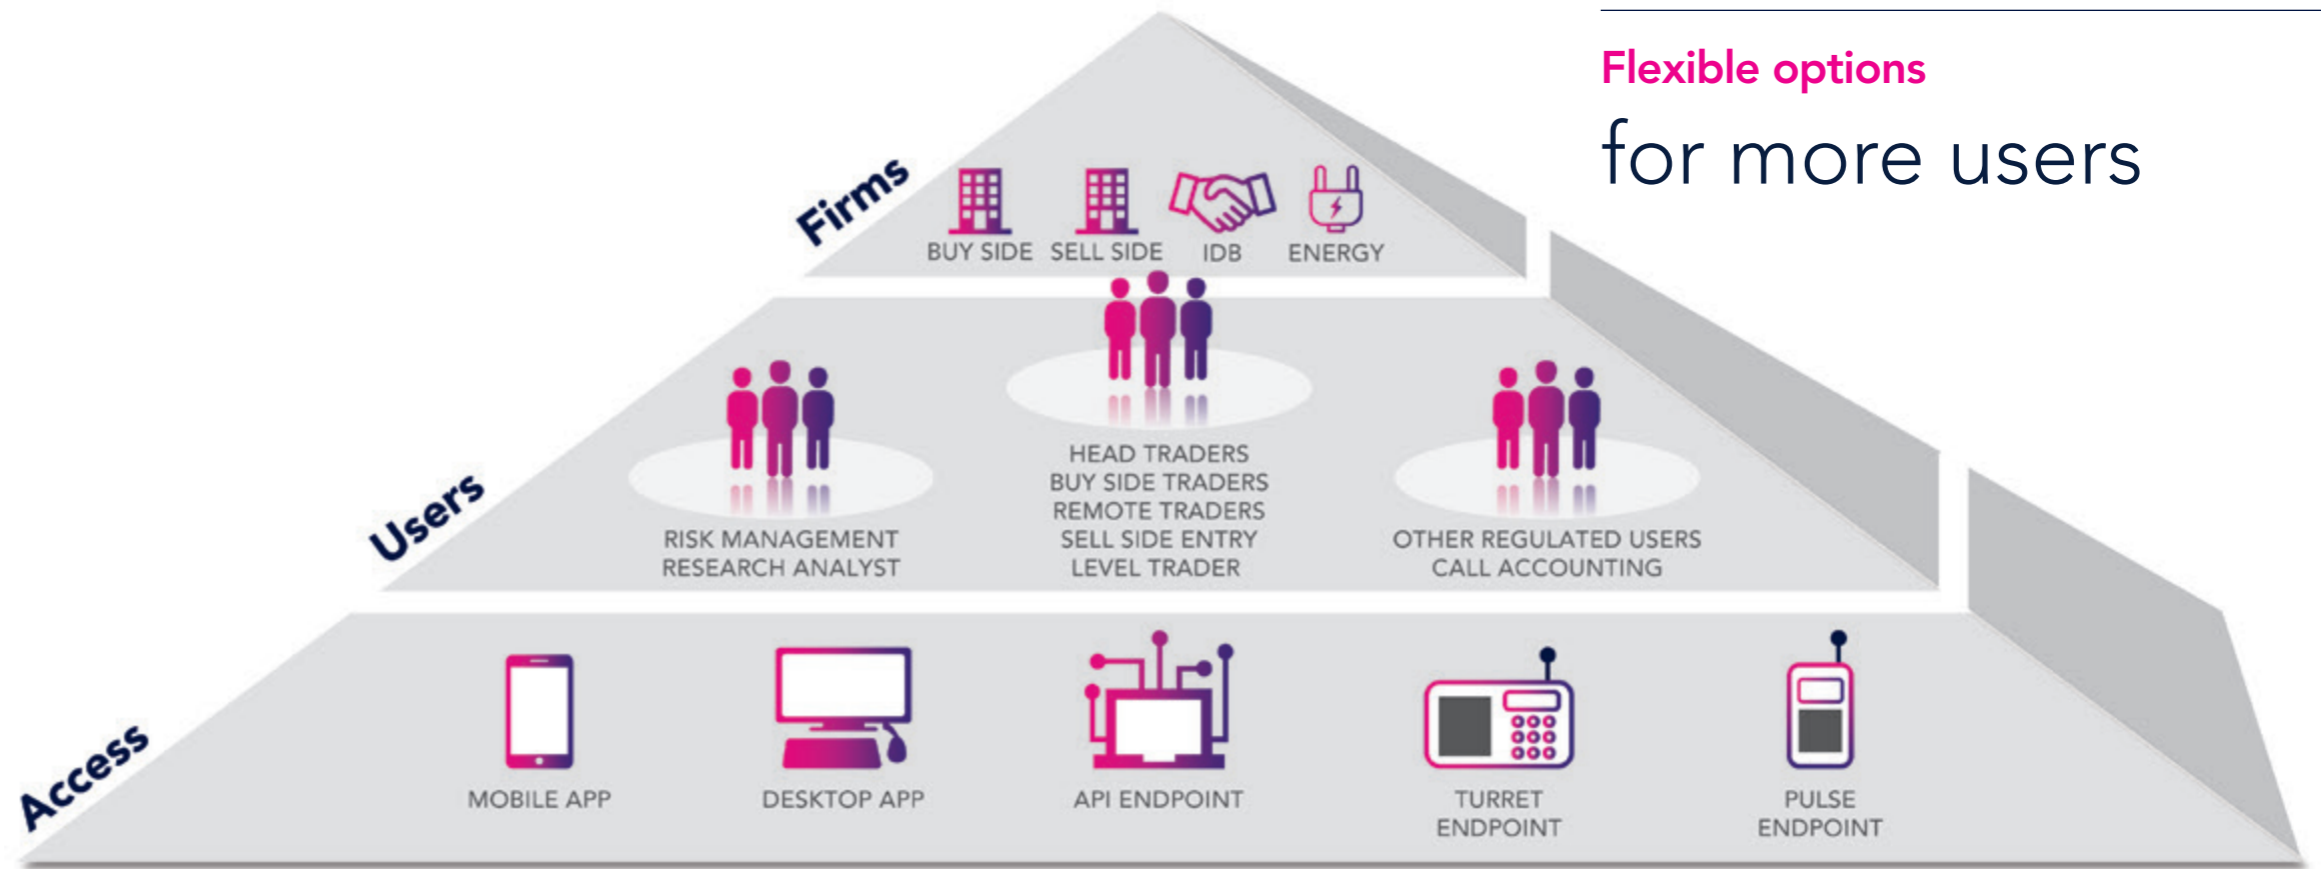

Unigy 360 supports multiple profiles that can then be customized with the features and applications that are relevant for each individual user's needs. These include common functionality along with compliance functions such as recording and archiving for your regulated users. Choose the profile settings that best meet the role of each user and customize it to their specific needs. As your needs change so can your service to ensure that you always have what you need.

Secure Connectivity for Unigy 360

Unigy 360 encrypts all communications and uses the secure infrastructure of IPC's Connexus® Cloud to ensure the reliability of your communications. The Connexus Cloud is one of the largest, secure and private networks dedicated to the financial community. You are part of a community that spans more than 6,000 locations throughout the world across every market segment and financial counterparty.

Flexible options

for more users

Add Endpoints as a Service

Unigy 360 gives you access to IPC's award-winning endpoints that help streamline everyday tasks for the trading community.

- **IQ/MAX® Touch** – IPC's most advanced communications device with an intuitive touch screen interface to speed up every aspect of voice communication
- **Pulse** – IPC's collaboration tool for middle and back office personnel providing instantaneous and seamless access to hoot and intercom

Add Compliance Services

Unigy 360 also gives you access to IPC's compliance solutions to ensure you meet regulatory requirements affecting voice communications. IPC offers:

- Capture of all voice, mobile, email, IM and Skype® communications.
- Archive of all voice communication data to be accessed when needed.
- Analytics that turn data capture and storage from a regulatory requirement to a competitive asset.
- Assurance services that provide health checks and reporting to ensure your compliance tools are operating efficiently.

Unigy 360's Software as a Service Delivery Model

A seamless and fully managed service

Unigy 360 is designed to provide all the key attributes of IPC's Unigy Platform in an on-demand, cloud-based model for the speed-to-market, services and customization your organization needs to succeed.

These key attributes include:

- Installation and operation
